

# SECURITY MANAGEMENT POLICY

Pembina Pipeline Corporation (the "Corporation") together with its affiliated entities (collectively "Pembina") are committed to protecting the safety of our workers, the public, and to safeguarding Pembina's facilities and information. These areas are of paramount importance to management, employees and contractors at the Corporation. Pembina believes that excellence in Security Management is essential to the well-being of the Corporation. To achieve this Pembina will:

- Identify security risks, and establish appropriate programs and procedures to reduce these risks to an acceptable level.
- Develop and maintain standards of performance that meet or exceed industry standards, legal and regulatory requirements and provide the training necessary for employees and contractors so that they understand and have the necessary skills to meet these standards.
- Provide the tools to ensure that our employees and contractors conduct their activities responsibly in accordance with Pembina security standards.
- Maintain regular monitoring of security performance to ensure timely improvement in operating practices.
- Promote and maintain communications with the public impacted by our operations so we can address any potential concerns.
- Develop, and maintain security and emergency response plans appropriate for our operations and test their effectiveness on a regular basis.
- Hold all levels of management accountable for providing leadership, visible commitment, direction and resources to meet our security goals.

**Pembina takes this commitment to security seriously, and employees and contractors are expected to live up to this commitment.**

This Policy was last approved by the Board of Directors on August 9, 2012.
